Image Preparation Using Lightroom

- Export is part of the Library Module
- Multiple images may be selected
- Export Dialog Options:
  - Export Location: choose output file location & optional subfolder
  - File Naming: custom name-sequence
    e.g. “Jeff Lackey-Adv-Color-001.jpg”
  - File settings: output file format = JPG, Color Space = sRGB
  - Image sizing: resize to Fit; width = 1920 pixels, height = 1080 pixels.
  - Output Sharpening (Optional): sharpen for screen, std. amount
- Tip: Save Export Settings as a Preset
